

DEEPTHI T

.NET TECHNICAL LEAD

Technical Lead | Senior .NET Software Engineer | Solutions Architect

PROFESSIONAL SUMMARY

.NET Technical Lead and Senior Software Engineer with 13.7+ years of experience in enterprise software development, healthcare applications, application modernization, software architecture, database engineering, BI/reporting, full-stack development, DevOps, production support, and software delivery. Hands-on expertise in C#, .NET, .NET Core, ASP.NET MVC, ASP.NET Core MVC, Web API, SQL Server, Entity Framework, JavaScript, React, TypeScript, Power BI, SSRS, TFS, Azure DevOps, Git, Python, Django, and FastAPI. Led teams of up to 5 developers with responsibility for task assignment, code review, technical guidance, developer training, architecture and technology decisions, reusable/common component development, database performance tuning, production issue resolution, deployments, and release management.

AptInfoSoft (formerly Aptesoft)

Software Engineer → Senior Software Engineer → Technical Lead | 2012 – March 2026

Technical Lead | April 2022 – March 2026

- Led a development team of up to 5 developers, assigning work, reviewing code, providing technical guidance, training developers, and coordinating delivery.
- Owned application architecture and technology decisions for enterprise healthcare applications, selecting technologies and translating requirements into maintainable solutions.
- Personally handled application development, database engineering, debugging, production support, deployments, releases, and technical quality.
- Built reusable/common code components and shared libraries to reduce duplicated implementation and improve consistency and maintainability.
- Re-engineered the legacy Incident Management module and modernized functionality toward ASP.NET MVC and Web API architecture.
- Implemented Power BI dashboards and metrics-monitoring solutions using SQL Server data for healthcare and elder-care reporting.
- Performed SQL Server engineering across stored procedures, query optimization, indexing, schema design, performance tuning, data migration, and troubleshooting.
- Managed production incidents and root-cause analysis, then coordinated fixes through Azure DevOps deployment and release cycles.
- Used Azure DevOps Repos, Boards, Work Items, Pipelines, Releases, and Pull Requests; used Git for branching, merging, and pull-request workflows.
- Used TFS from 2012–2020 for source control and software development lifecycle activities.

Senior Software Engineer | December 2016 – March 2022

- Built core ASC WebQI healthcare portal modules including Credential Tracker, Incident Management, and Policy Modules.
- Worked on ASC WebQI, a healthcare quality-improvement application supporting Ambulatory Service Centers through Incident Reporting, Audits, Surveys, Credentialing, Staff Tracker, Meeting Manager, Dashboards, and Reporting.
- Developed enterprise applications using C#, .NET, ASP.NET MVC, WebForms, SQL Server, JavaScript, jQuery, and Bootstrap.
- Modernized legacy modules toward ASP.NET MVC and Web API and created reusable components for maintainable application development.
- Optimized SQL Server stored procedures, queries, indexes, and schemas and implemented Power BI and SSRS reporting solutions.

GITHUB

github.com/Deepthi285krishna

PORTFOLIO

deepthimagician.netlify.app

CORE SKILLS

- C# / .NET / .NET Core
- ASP.NET MVC / ASP.NET Core MVC
- Web API / REST APIs
- SQL Server / PostgreSQL
- Entity Framework / EF Core
- React / TypeScript / JavaScript
- Python / Django / FastAPI
- Power BI / SSRS / RDLC
- TFS / Azure DevOps / Git
- Clean Architecture / SOLID
- OpenAI API / AI / ML / RPA

LEADERSHIP

- Team size: up to 5 developers
- Task assignment
- Code review
- Developer training
- Architecture decisions
- Technology selection
- Production support
- Deployment & release ownership

EDUCATION

B.E. – Computer Science & Engineering
Visvesvaraya Technological University (VTU), Bangalore
Graduated 2011

HEALTHCARE PROJECTS

ASC WebQI — Healthcare Quality Improvement Platform

Senior Software Engineer | 2016 – 2022

Enterprise web-based healthcare quality-improvement application supporting Ambulatory Service Centers through quality, compliance, and patient-safety workflows. The application included Incident Reporting, Audits, Surveys, Credentialing, Staff Tracker, Meeting Manager, Dashboards, and Reporting.

MY RESPONSIBILITIES

- Built application functionality using C#, ASP.NET MVC, SQL Server, and Microsoft technologies.
- Worked on Credential Tracker, Incident Management, and Policy Modules.
- Re-engineered legacy Incident Management functionality and supported modernization.
- Created reusable/common components and libraries to improve code reuse and maintainability.
- Implemented Power BI dashboards and SQL Server-based reporting solutions.
- Optimized stored procedures, queries, indexes, and database operations.

IHN Suite — Interactive Health Network

Software Engineer | 2012 – 2014

Integrated clinical and financial healthcare application for the Long-Term Care industry, supporting Admission, Care Plans, Clinical Documentation, Resident Census, and related healthcare workflows.

MY RESPONSIBILITIES

- Developed and enhanced healthcare workflows using C#, VB.NET, and SQL Server.
- Worked with legacy desktop application functionality and contributed to modernization toward web architecture.
- Developed RDLC reports and supporting database components.
- Handled debugging, application maintenance, database changes, and production support.
- Used TFS for source control and software development lifecycle activities.

iPortal — Healthcare Application Modernization

Software Engineer | 2014 – 2016

Healthcare application modernization initiative involving migration of legacy Windows Forms functionality toward ASP.NET MVC-based web architecture.

MY RESPONSIBILITIES

- Migrated and redesigned legacy desktop functionality for web-based implementation.
- Developed application UI, business functionality, and SQL Server integration.
- Worked with C#, .NET, ASP.NET MVC, Windows Forms, and SQL Server.
- Handled debugging, maintenance, application enhancements, and deployment support.

INDIVIDUAL TECHNICAL RESPONSIBILITIES

- Application Development: C#, .NET, .NET Core, ASP.NET MVC, ASP.NET Core MVC, Web API, SQL Server, and Entity Framework.
- Architecture: technology selection, application architecture decisions, modernization, maintainable solution design, and technical implementation.
- Reusable Engineering: common code, shared libraries, reusable components, and standardization across modules.
- Database Engineering: stored procedures, query optimization, indexing, schema design, performance tuning, migration, and troubleshooting.
- BI and Reporting: Power BI, SSRS, Paginated Reports, and RDLC reporting.
- DevOps and Deployment: TFS, Git, Azure DevOps Repos, Boards, Work Items, Pipelines, Releases, Pull Requests, branching, merging, and deployment support.
- Production Support: incident investigation, root-cause analysis, defect resolution, release validation, and post-production support.
- Technical Leadership: team of up to 5 developers, task assignment, code review, technical guidance, mentoring, and developer training.

SELECTED AI / AUTOMATION PROJECTS

Magician Future Developer Hub

C#, .NET MVC, OpenAI API, SQL Server

AI-driven SDLC/STLC automation platform for Agile backlog generation, QA test cases, development support, and estimation metrics.

RPAREviewAuditTDS

Python, FastAPI, openpyxl, ReportLab

Compliance auditing solution that parses technical datasheets, identifies specification deviations, and generates compiled PDF reports.

Magician Instructor (AutoMage)

Python, Playwright, SQLite

Automated data-crawling pipeline for educational course structures and LMS database seeding.

Magician StockMarket RPA

Python, Playwright, Selenium, pandas, openpyxl

RPA solution for collecting market analytics and producing structured Excel summaries.

PORTFOLIO

deepthimagician.netlify.app

CORE SKILLS

- C# / .NET / .NET Core
- ASP.NET MVC / ASP.NET Core MVC
- Web API / REST APIs
- SQL Server / PostgreSQL
- Entity Framework / EF Core
- React / TypeScript / JavaScript
- Python / Django / FastAPI
- Power BI / SSRS / RDLC
- TFS / Azure DevOps / Git
- Clean Architecture / SOLID
- OpenAI API / AI / ML / RPA

LEADERSHIP

- Team size: up to 5 developers
- Task assignment
- Code review
- Developer training
- Architecture decisions
- Technology selection
- Production support
- Deployment & release ownership

CAREER HIGHLIGHTS

- 13.7+ years experience
- Progression to Technical Lead
- Healthcare enterprise applications
- Legacy modernization
- Reusable/common libraries
- SQL Server performance
- Power BI implementation
- DevOps & deployments
- AI/ML & RPA
